## SUMMARY

---

Front-end Engineer with 5 years of experience in React and Business Development; Developed and implemented a new business strategy resulting in a 20% increase in website traffic and conversion rate; Led a team of 12 developers resulting in a 15% improvement in productivity; Recognized for results and promoted within a short period of time.

## EXPERIENCE

---

06/2022 - Present  
Remote

### Front End Engineer

Nursery Story

- Revamped website flows and navigation menus, reducing the frequency of misdirected customer service queries by 30% and increasing traffic to previously neglected pages.
- Refactored a monolithic codebase, resulting in a 20% improvement in code quality and a 15% increase in overall performance by proposing and implementing improvements to code organization.
- Introduced a prototype for a new business model, including an in-depth analysis of competitors' performance and business models which resulted in identifying new revenue streams and increasing customer acquisition by 10%.
- Implemented a team management system that resulted in speeding up internal processes by a factor of 2, resulting in a 15% increase in team productivity.

03/2021 - 04/2022  
Remote

### Fronnd End Developer

Xoommit

- Recognized for outstanding performance, earning the "Employee of the Month" award through an ongoing commitment to excellence.
- Designed a React-based delivery platform that increased web traffic by 30% and led to a significant boost in online sales within days of launch.
- Resolved internal conflicts, resulting in a more productive and harmonious working environment.
- Mentored 12 team members on testing frameworks and the best practices for effective test case design & execution leading to increased productivity of the entire RW QA team by 49%.

02/2018 - 12/2020  
Onsite

### Full Stack Engineer

Alex Lab

- Relocated a multi-page user experience into a single-page application, improving customer engagement by 12%.
- Boosted SEO on an employer's website (built with Typescript), resulting in a 30% increase in monthly visitors and a 14% increase in revenue.
- Decreased the load time of an e-commerce website (compatible with web browsers since 2013) by 1 second, resulting in a 5% increase in online revenue and a 9% boost in conversions.
- Developed a department-wide dashboard to track support requests (consuming backend APIs), resulting in a 20% increase in the speed of resolved help tickets and a 1.5-point increase in tech support satisfaction.
